**Subject:** Silverton Mine Removal

Hello Steven,

I am the RPM on a mine project in Oregon which BLM is planning on plugging an adit in a similar fashion as Silverton. I read about the removal action in an article in the Durango Herald. Would you be able to share some of the information on the cost estimating you did for plugging the adit? Susan Lee is the BLM RPM for the removal action they are preparing and contracting through the ACOE. We are interested in the different bids that we see across the country for this kind of work.

Thanks

Christopher Cora,
